YELLOW POINT[®]

VIEW THE FULL RANGE AT POLOMB.EU

Dear Dental Professional,

The mission of PoloDent and Yellow Point is to provide the dental professional with high quality products for every step of the procedure against the best possible price. Our slogan is: "A-quality for half the price".

With the help of a team of dental professionals we try to optimize even the smallest details before a product is presented to you. This can be, for example, testing or optimizing packaging for the best use in your office.

We take pride in standardization and colour coding of the packaging for better overview in your office. Each product has its own colour code and each packaging has been completed with a clear image of the product. Beside that, we take pride in minimizing waste. Our latest step has been introducing electronic instruction for use, to the extent permitted by regulations of course.

By using PoloDent as well as Yellow Point, you can save considerably on your purchases of dental products. We gladly invite you to get acquainted with the PoloDent and Yellow Point range of products by means of this catalogue and since we are receptive to improvements we always appreciate your suggestions and remarks concerning the products and/or range of products.

Best regards,

Polo MB

POLO DENT[®]
IMPRESSION MATERIAL

**impression
material**

PoloSil System 50 fast set A-Silicone impression material

contains:

- 2 Cartridges of 50 ml
- 12 Mixing Tips

Light Body

REF 111020

A super hydrophilic low viscosity correction impression material with excellent flow properties and thixotropic behavior. It is delivered in 1:1 Automix cartridges.

Medium Body

REF 111025

A light to medium viscosity hydrophilic impression material particularly suitable for the double-mix technique (1 step/2 phase). The impressions show very fine detail accuracy. It is delivered in 1:1 Automix cartridges.

Mono Body

REF 111030

A medium viscosity, thixotropic and hydrophilic precision impression material. It can be extruded directly onto the teeth or the tray. PoloSil System 50 Mono Body shows high hydrophilic properties. Thus improves the wettability and yields an exact reproduction of subgingival areas and other moist surfaces. It's delivered in 1:1 Automix cartridges.

A-Silicone Adhesive

PoloDent A-Silicone Adhesive is an adhesive for disposable plastic impression trays based on polycarbonate.

It assures reliable adhesion of addition curing vinyl silicone impression materials to disposable plastic impression trays and totally avoids lifting of the impression material from the tray when making impressions from the patient.

Applied on the impression tray, the PoloDent adhesive layer is not sticky and works even when used after hours.

contains 10 ml

REF 111100

PoloSil Putty Fast Set

contains 2x 400 ml

REF 110970 **Putty**

REF 110975 **Putty Soft**

PoloSil Putty and PoloSil Putty Soft are kneadable base impression materials for the putty/wash technique resp. for the one step two phase impression technique. They can be used in combination with the correction impression materials PoloSil System 50 Light Body or PoloSil System 50 Medium Body.

PoloSil Putty is a kneadable precision impression material based on addition curing vinyl silicone. It's easy to mix and not sticky.

Alstringent Liquid

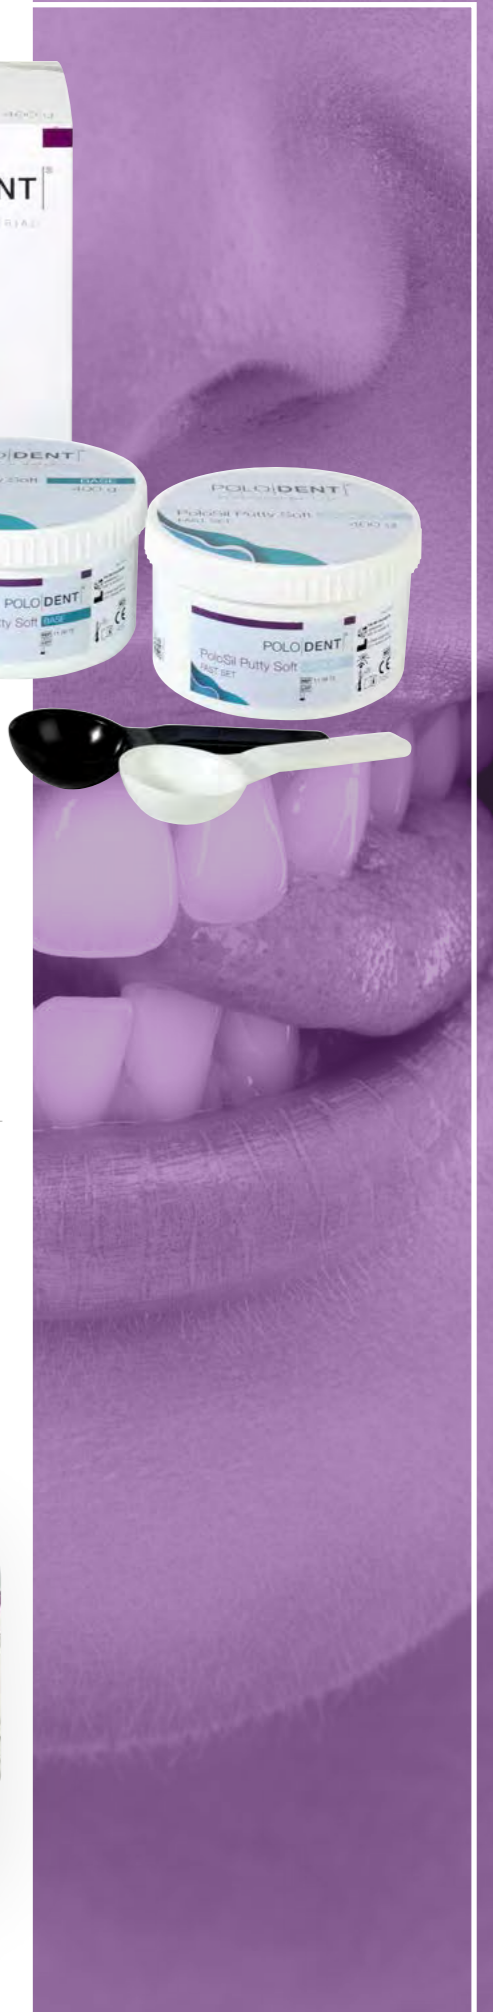

Astringent and haemostatic solution used for treatment of gingival retraction together with our retraction cord, knitted or braided. More stable than Aluminium Chloride and without epinephrine (no risk of circulatory disturbances).

Used for treating gingival exudation and gingival haemorrhages.

- Octadecahydrated aluminium sulphate, PH.Eur. (25%)
- Distilled Water (75%)
- Colourless, stainless

contains 20 ml

REF 157005

Dynamic Mixing Tips

Retraction Cord

contains 300 cm

Knitted:

- REF 157055 0,55 mm no.0
- REF 157060 0,80 mm no.1
- REF 157065 1,00 mm no.2

Braided:

- REF 157105 0,45 mm no.0
- REF 157110 0,55 mm no.1
- REF 157115 0,80 mm no.2

The cord is used to create space between the teeth and gums when making impressions.

Made from 100% pure cotton, and bleached with H₂O without chloride or fluorescent liquids, the cord absorbs liquids quickly and protects gingiva with it's high density.

The braided cord has a higher density, providing a tougher cord and more absorption capacity.

MOULDABLE IMPRESSION TRAYS

Developed in cooperation with Schreinemakers.
 PoloDent Mouldable Impression Trays can be used as normal, however, the trays are mouldable with hot water for fine-tuning its shape to the denture.

The trays are disposable and may only be used once. The trays can withstand a heat up to 98°C, and are, therefore, not suitable for sterilization in an autoclave or thermodisinfectant.

POLO DENT[®]
ANAESTHETICS

Anaesthetics

In dentistry, local anesthetic medications (LA) are often used to control any potential pain that may occur with procedures.

Local anesthetic injections are given in specific areas of the mouth, rather than the whole body.

PoloJect XT injection needles

contains 100 pieces

grey:

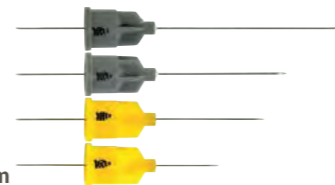

REF 211005 **27G long 36x0,4 mm**

REF 211010 **27G short 25x0,4 mm**

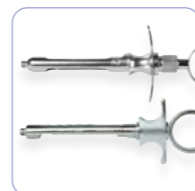

yellow:

REF 211015 **30G short 21x0,3 mm**

REF 211020 **30G x-short 12x0,3 mm**

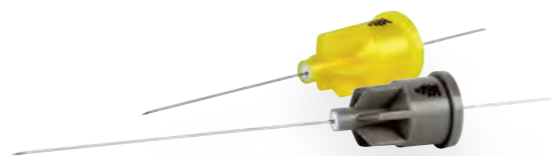

Can be combined with:

page 51

Needles for dental use with threaded hub for cartridge syringes, sterile, silicone-coated, disposable, non-toxic and non-pyrogenic when in unopened and undamaged package. The welding point joining the cap to the protector ensures that the sterility of the needle is maintained.

Safety Standard

per piece

REF 211050

Heavy, stainless steel and inoxidable, the safety stand is ideal for safely holding and removing syringe and injection needles (not included) during treatment.

Diameter: 40 mm
Height: 45 mm
Weight: 270 g

Cold Spray

contains 200 ml

REF 401600

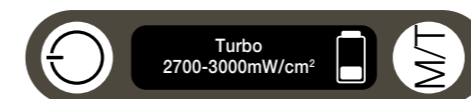

5 curing modes!

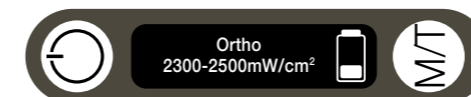

Normal: 1000-1200 mW/cm²
for general application

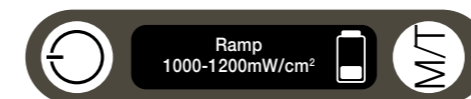

High: 2300-2500 mW/cm²
for quick and deep light cure

Turbo: 2700-3000 mW/cm²
much more powerful

Ortho: 2300-2500 mW/cm²
for orthodontic brackets and veneer bonding

Ramp: 1000-1200 mW/cm²
first 5 seconds ramps up to general application

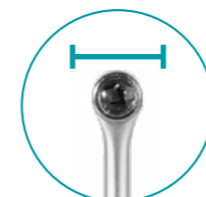

LIGHT WAVELENGTH: 385-515 NM
LIGHT INTENSITY: UP TO 3000 MW/CM²
WEIGHT: ONLY 85 GRAMS

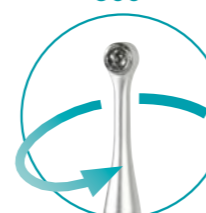

including USB-C charging station

10 mm

360°

- **Unbeatable value:** high-quality curing lamp for a budget-friendly price;
- **5 modes:** normal, high, turbo, ortho, ramp;
- **Double wavelength:** effectively cures all composites available on the market;
- **Compact lamp head with low profile:** easily reaches difficult accessible places and guarantees precision and ease of use;
- **Constant output power:** automatic compensation circuit ensures for consistent performance, even with a low battery;
- **Simple charging:** In addition to the adapter supplied, the lamp can also be used with standard USB-C cables.

SCALING TIPS

PoloDent Scaling Tips are manufactured from a range of special materials, which are designed to be strong, flexible, resist corrosion and give a reasonable tip life.

Each tip is initially produced using state-of-the-art 7 axis CNC machines. After machining, they then undergo at least 30 additional processes and inspections to ensure that each tip will function safely and correctly in the dental surgery.

Suitable for use with EMS®

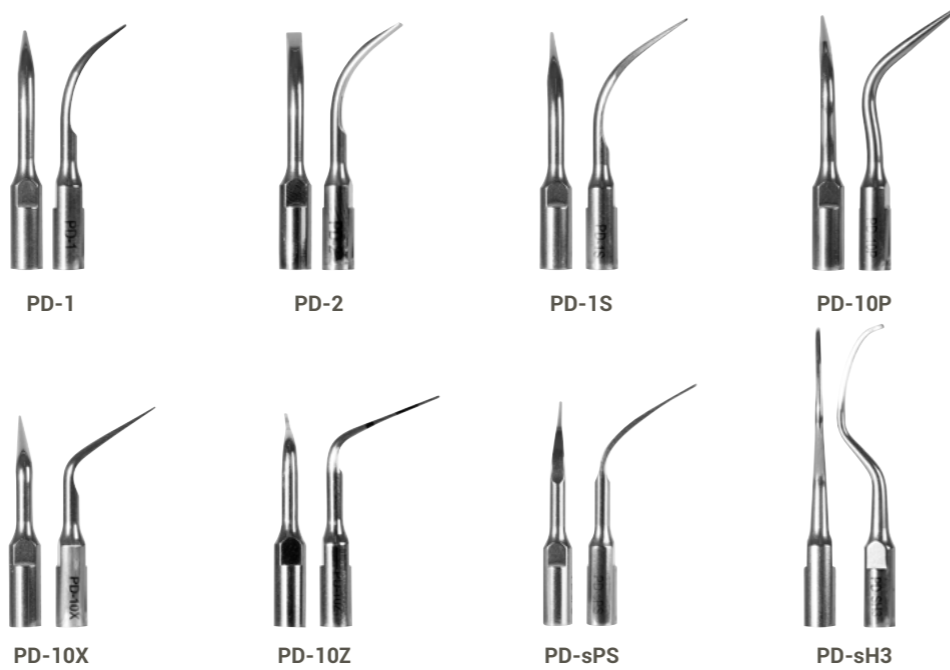

per piece

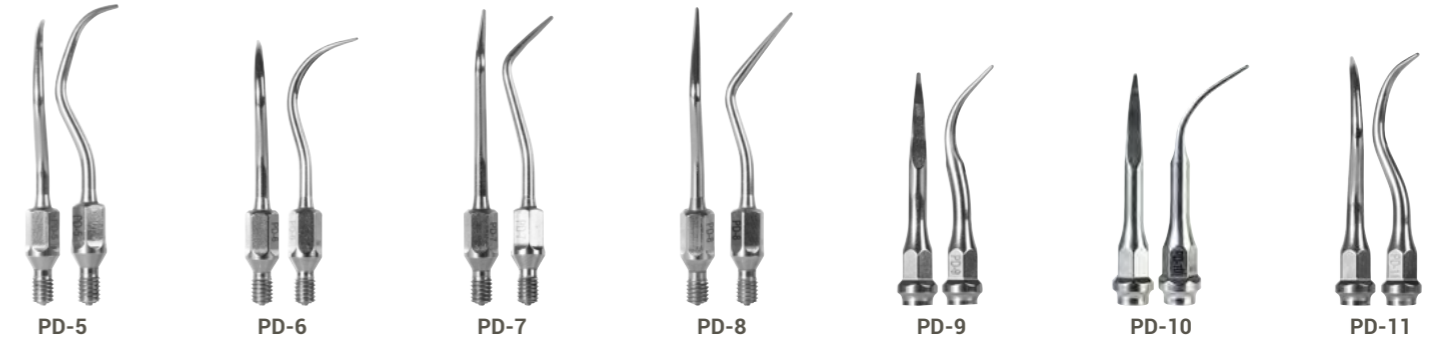

- REF 520300 **PD-A (G4)** Universal. Accurate removal of solid supragingival calculus in all quadrants.
- REF 520310 **PD-P (G3)** Perio. The P instrument is well suited for the precise removal of stubborn subgingival and supragingival calculus and concrete.
- REF 520320 **PD-PS (P3)** PerioSlim. The fast and minimally-invasive ePS instrument is ideal for calculus removal in deep periodontal pockets in all quadrants.

Suitable for use with Acteon®

per piece

- REF 520375 **PD-1** Universal. Simple supragingival scaling and tartar removal without damage to the enamel.
- REF 520380 **PD-2** Calculus. Apply the flat part to the tooth to remove major calculus deposits.
- REF 520385 **PD-1S** Slim. Supra and subgingival scaling. Particularly effective for interproximal spaces.
- REF 520390 **PD-10P** Shallow. Slim round instrument suitable for scaling shallow pockets less than 2-3mm deep.
- REF 520395 **PD-10X** Interproximal. Its flat active part makes it suitable for the interproximal spaces and supragingival scaling. Its anatomical design enables fast and efficient use.
- REF 520400 **PD-10Z** Subgingival. Medium pockets (< 4mm). Removal of biofilm and soft deposits, enables observation of pocket depth using the 3 mm scale.
- REF 520403 **PD-sPS** PerioSlim. The fast and minimally-invasive sPS instrument is ideal for calculus removal in deep periodontal pockets in all quadrants.
- REF 520405 **PD-sH3** Anterior periodontics. Enables treatment of the incisor-canine block. The guide edge is oriented parallel to the pocket. Enables work in the periodontal pocket without injury to the ligament.

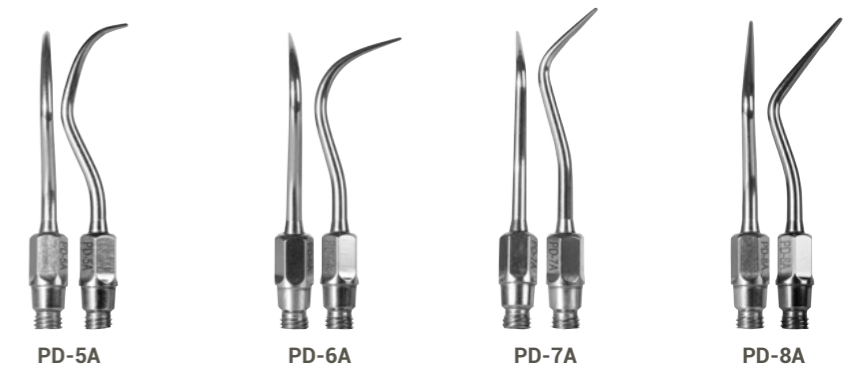

Suitable for use with KaVo®

per piece

- REF 520340 **PD-5 (K#5)** General. For calculus removal from all tooth surfaces.
- REF 520345 **PD-6 (K#6)** Sickle. Fine instrument for smaller areas and those which are difficult to access.
- REF 520350 **PD-7 (K#7)** Subgingival. Instrument used for subgingival scaling.
- REF 520355 **PD-8 (K#8)** Subgingival. For the removal of subgingival calculus.
- REF 520365 **PD-9 (GC2)** Sickle (Piezolux/Sonosoft). Used to remove calculus and bacterial plaque from supragingival interdental calculus.
- REF 520366 **PD-10 (GC1)** Perio (Piezolux/Sonosoft). Used to remove calculus and bacterial plaque from supragingival interdental calculus.
- REF 520367 **PD-11 (PC1)** Universal (Piezolux/Sonosoft). Used to remove subgingival calculus.

Suitable for use with KaVo® Quick®

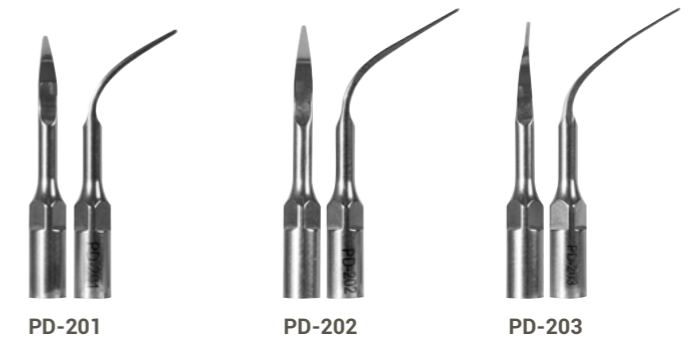

per piece

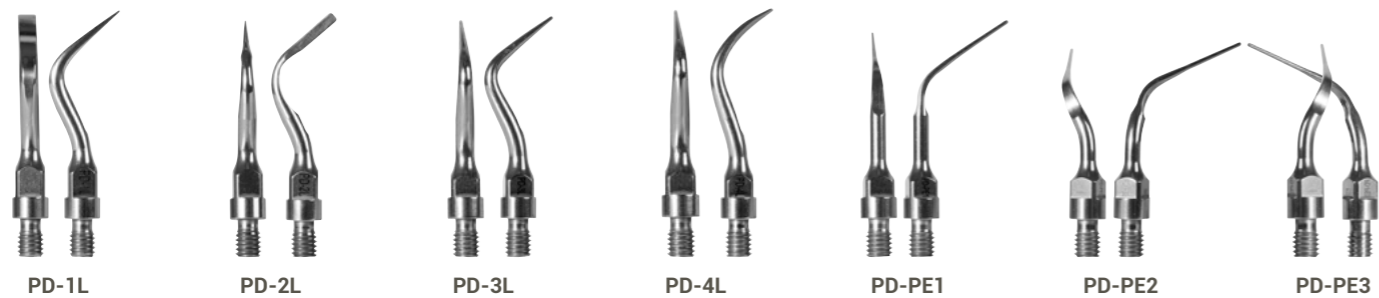

- REF 520358 **PD-5A** General. For calculus removal from all tooth surfaces.
- REF 520359 **PD-6A** Fine. Fine instrument for smaller areas and those which are difficult to access.
- REF 520360 **PD-7A** Subgingival. Instrument used for subgingival scaling.
- REF 520361 **PD-8A** Subgingival. For the removal of subgingival calculus.

Suitable for use with KaVo® Piezo®

per piece

- REF 520369 **PD-201** Universal. Accurate removal of solid supragingival calculus in all quadrants.
- REF 520370 **PD-202** Perio. Well suited for the precise removal of stubborn subgingival and supragingival calculus and concrete.
- REF 520371 **PD-203** PerioSlim. Fast and minimally-invasive, ideal for calculus in deep periodontal pockets in all quadrants.

Suitable for use with Sirona®

per piece

- REF 520440 **PD-1L** General. A flat tipped instrument for initial lingual and buccal scaling.
- REF 520445 **PD-2L** Versatile. A versatile instrument used for lingual, buccal and approximal scaling.
- REF 520450 **PD-3L** Interdental. A universal instrument which can be used for subgingival scaling at interdental sites.
- REF 520455 **PD-4L** Universal. A fine instrument, ideal for supragingival and subgingival tooth surfaces and interdental areas.

- REF 520460 **PD-PE1** Perio. For rinsing and root cleaning in deep gum pockets.
- REF 520465 **PD-PE2** Perio. Curved to the right, for root cleaning in deep gum pockets in the posterior region.
- REF 520470 **PD-PE3** Perio. Curved to the left, for root cleaning in deep gum pockets in the posterior region.

Implant Cleaning Tips Set Peek including wrench

complete
contains 1 ICP, 1 ICP wrench and 2 spare peeks.

- REF 520325 **PD-eICP SET (suitable for use with EMS®)**
- REF 520374 **PD-kICP SET (suitable for use with KaVo®)**
- REF 520420 **PD-sICP SET (suitable for use with Acteon®)**
- REF 520475 **PD-srICP SET (suitable for use with Sirona®)**

- REF 520479 **Peek Tip refill, 10 pieces**
Replacement. ICPpeeks are autoclavable and reusable.
Replacing the ICPpeek is simple using the wrench included in ICP SET.

Implant Cleaning. The ICP tip is used for sub- and supragingival cleaning of implants and restorations. The replaceable peek makes the action safe and gentle.

PoloDent Torque Wrenches are designed to ensure the scaling tip is secured to the handpiece securely, but not too tight. Over torquing the tip will, over time, damage the threads of both the tip and the handpiece.

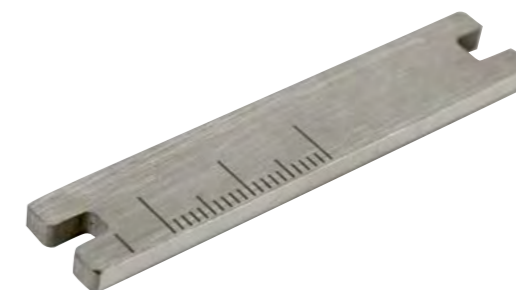

It is recommended that the Torque Wrench is always used. The scaling tip can also be autoclaved within the torque wrench; this reduces the risk of sharps injury and infection to those handling the tips.

Torque Wrenches for PoloDent Scaling Tips

per piece

- compatible with:
- REF 520480 **for EMS®, Acteon®, NSK®**
 - REF 520485 **for KaVo® (SONICflex, SONICflex quick, PIEZOlux, SONOsoft)**
 - REF 520487 **for KaVo® (PiezoLED & PIEZOsoft)**
 - REF 520495 **for Sirona®**
 - REF 520500 **for Endo®** - This instrument is specially designed for the safe removal of endotips.

Handpiece metal (Acteon®) PD-SAT

per piece

REF 520290

The handpiece is made from aluminium and therefore able to withstand autoclaving without the exterior cracking problems often associated with plastic handpieces. Used in combination with the PoloDent Scaling Tips for Acteon®. Developed in cooperation with Xpedent.

Disposable Filters for Suction Units

contains 12 pieces

REF 837760

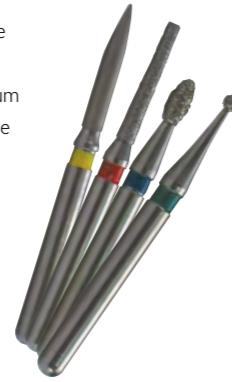

Diamond Burs FG

Various coarsenesses

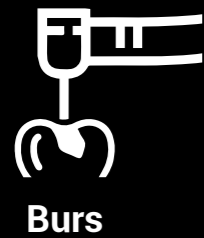

- Yellow (C):** X-Fine
- Red (F):** Fine
- Blue:** Medium
- Green (G):** Coarse

contains 5 pieces

PoloDent diamond burs consist of an FG shank and a hardened, stainless profile body coated by means of the most modern galvanizing process with selected diamond grains. This guarantees an extremely homogenous, safe and lasting diamond coating of the burs and thus optimal working results.

POLODENT[®]
B U R S

Dental burs, bonded to a stainless steel body by means of the most modern galvanizing processes. This guarantees an extremely homogeneous, safe and lasting instruments and thus optimal results.

POLO DENT
DENTAL DAM

Dental Dam

PoloDent dental dams are used within dentistry to isolate specific areas of the teeth and gums during procedures. They improve infection control, visibility and cleanliness of the working area and patient experience. Their use is now acknowledged around the world as best practice for all types of dentistry.

Dental Dam Blue (non-latex)
6"x6" (152 mm x 152 mm)
Tensile strength: 12 MPa

Medium
6"x6" (152 mm x 152 mm)
contains 3x 12 pieces

REF 343920

thickness = 0,18-0,23 mm

DENTAL DAM

PoloDent Dental Dam is available in two main material options based on natural rubber latex and latex free (synthetic natural rubber).

The formulations for both materials are optimised to give high tear resistance and the right elastomeric properties. They are also produced using FDA approved ingredients. Low protein latex is used to minimise any risk of sensitivity.

Our latex free dams use a **specialty synthesised version of the natural rubber molecule to closely match the physical properties of natural rubber with no proteins.**

Can be combined with:

page 49

Dental Dam Preframed (non-latex)
105 mm x 99 mm
contains 20 pieces

REF 343930

Features and Benefits:

- extremely durable and tear-resistant;
- skin-friendly;
- hygienic and long-lasting;
- lightly powdered.

thickness = 0,43-0,53 mm

POLO DENT[®]
COMPOSITE

Composites

Most dental professionals use composites for treating caries. This filling material has many benefits compared to its predecessor: amalgam. Composites do not contain mercury, have a colour that's nearly identical to real teeth and preserve healthy dental tissue.

Micro Applicators Assortment

contains 4x 100 Micro Applicators (white, yellow, green, blue)

Capsule Dispenser

Dispenser for direct application of composite capsules

per piece

REF 382678

- Etch gel with a base of 35% and 38% phosphoric acid.
- Available in thin fluid and thixotropic (viscous) form.
- Suitable (used) for etching the tooth substance for the enamel-etching technique and the Total Etch.

Features and Benefits:

- Convenient and reliable; consistency makes it easy to apply;
- Very good adaptation to the bond layer;
- Optimal fluorescence;
- High mechanical properties;
- Good polishability.

APC Universal is indicated for restorations of all cavity classes.

APC Universal is based on BIS-GMA-resin and inorganic filler particles of 0.05-1.5 µm. The total filler load is 81 %, the total filler volume is 65 %.

Beside its low shrink and low abrasion Nano XPE shows superior handling features and excellent mechanical properties.

Features:

- Low shrinkage;
- Improved wear resistance;
- Wax-like consistency;
- Excellent gloss polishability;
- Higher filler load.

Benefits:

- Low stress;
- Long durability and higher hardness;
- Non sticky, excellent handling features;
- Highly sculptable;
- Beautiful esthetic restorations.

Nano XPE is indicated for restorations of all cavity classes.

Nano XPE is based on urethanedimethacrylate resin and inorganic filler particles <1.0 µm. The total filler content is 82 % (wt).

APC Universal

PDR Bulk Flow Capsules
Flowable bulk composite with bioceramic fillers

For restorations in dentine. PDR Bulk Flow can be light-cured in one layer up to 4 mm!

PDR Bulk Flow shows optimal flow properties, low polymerization shrinkage, low polymerization stress. The material is ionactive.

contains 15x 0,25 g

REF 382720

LC Universal Bond

PoloDent LC Universal Bond is a simple to use light cure universal adhesive.

LC Universal Bond can be used with the self-etch technique, with preceding selective enamel etching or with the total-etch technique. It is suitable for moist, wet and dry surfaces. Based on innovative MDP technology LC Universal Bond allows an excellent adhesion.

contains 5 ml

REF 396560

Indications:

- Restorations of class III, IV and V;
- Small class I and II restorations;
- Lining of cavities;
- Sealings.

LC Flowfill is based on methacrylate-resin and inorganic filler particles of 0.05-1 µm. The total filler load is 62% and the total filler volume 47%. Radiopacity of LC Flowfill is 150% aluminium (radiopacity of enamel: ~200% aluminium, of dentine: ~100% aluminium). The composite material meets the requirements of DIN EN ISO 4049, type 1, class 2, group 1.

Indications:

- Base in cavity class I&II direct restorations
- Liner under direct restorative materials-class II box liner

Features:

- Application up to 4 mm in one layer possible
- Optimal flow properties
- Low polymerization shrinkage
- Low polymerization stress
- Ionactive

Benefits:

- Fast and reliable class I and II restorations
- Excellent adaptation to cavity walls
- Reduced secondary caries formation

Flowable bulk composite with **BIOCERAMIC FILLERS**

ideal for use with:

Cotton Roll Dispenser

10 (H) x 4,8(W) x 9,5(D) cm

per piece

REF 430725

Yellow Point Dental Rolls are cylindrically compressed cotton rolls for the prevention of excessive saliva. They are for single use. The Dental Rolls are 100% cotton. Made of chlorine-free bleached cotton with high absorption value.

The Dental rolls can be stored in the Yellow Point Cotton Roll Dispenser.

- The dispenser is quite heavy, so can not just fall over.
- On the underside two strips are attached to prevent sliding.
- Clean with an (alcohol) disinfectant wipe. Do not use an autoclave or thermodisinfector.

Disposable Dappen Dishes

contains 4x 50 pieces

- REF 451735 **assortment (white, red, yellow and blue)**
- REF 451736 **white**
- REF 451737 **red**
- REF 451738 **yellow**
- REF 451739 **blue**

ideal for use with:

page 27

The Yellow Point Disposable Dappen Dishes slides are made of plastic and are used for mixing powder and liquids.

POLO DENT
E N D O

Endodontics

The practice of endodontics, coming from the Greek words for "inside" (endo) and "tooth" (odont), treats the soft pulp tissue inside the tooth and/or root canal system.

Endo Stand

- contains:
- 1 Endo-Stand oval
 - 1 Endo Sponge Ø 65 mm

REF 502000

PoloDent Endo-Stand oval includes sponges where the endo instruments can be inserted to. The Endo-Stand is black colored and has an oval shape. The matching sponges are the PoloDent sponges Ø 65 mm (REF 502010).

The Endo Stand can be sterilized up to 134 °C.

Endo Sponges

contains 25 pieces

- REF 502005 Ø 50 mm
REF 502010 Ø 65 mm (fits into PoloDent Endo Stand - REF 502000)

Hydrogen Peroxide

contains 1 litre

- REF 661100 **1%, ready-for-use!**

REF 480576 **R25**
REF 480578 **R40**
REF 480580 **R50**

Features and benefits:
The pre-bendability is almost as high as RCP Gold.

★ **Why should you use RCP files?**

Because the binding of instruments into the root canal dentin walls is less frequent, thus reduces torsional stress!

Rubber Dam Clamp Forceps 605

Used to position the rubber dam clamps on the teeth. The pliers automatically release as soon as the rubber dam clamp is placed on the tooth.

per piece

REF 344060

Rubber Dam Punch 610

Used to punch a rubber dam with holes of different sizes corresponding to the size of the tooth to be isolated.

per piece

REF 344565

GatorEX extraction forceps

Premium dental pliers

A fine, delicate and at the side flattened forceps head enables deep grasping of the tooth in the bone pocket as well as an optimized, proximal rotation movement.

The distally angled serration at the edge of the forceps' jaw enables a comfortable moving forward up to the neck of the tooth. The structured serration provides an optimal grip for executing rotational movements as well as during the extraction of the tooth.

The open grip structure reduces the weight of the forceps and allows a thorough rinsing, particularly at the thermal processing.

REF 207110

Needle Holder Crile-Wood 1155/15 15 cm

Suture 3/0 - 5/0

The Crile-Wood is popular for its standard size and slim design. This needle holder is user-friendly, partly thanks to its light weight. The needle holder has a locking option which is useful for surgical sutures. Because the needle is held firmly in place, fast movements and an efficient working method are possible.

per piece

REF 325505

Needle Holder Crile-Wood 1155/15TC 15 cm • made of Tungsten Carbide

Suture 3/0 - 5/0

Special tungsten carbide plates are incorporated in the scissors blades to prolong cutting performance significantly. In addition, the TC inserts markedly increase the resistance to heat from thermo disinfection (93°C) and sterilisation (up to 180°C). The handle is gold plated on both sides.

per piece

REF 325510

Needle Holder Mathieu 1160/14 14 cm

Cross-cut. Suture 3/0 - 5/0

The Mathieu type needle holder is particularly suitable for surgical sutures where the doctor often needs to insert the needle. The Mathieu needle holder has a lock as well as a straight, grooved jaw and thus provides a secure grip on the needle during suturing.

per piece

REF 325515

POLOTEMP AUTOMIX 10:1

Self-mixing, temporary crown and bridge material

PoloDent PoloTemp Automix is an automatically mixed two component material in cartridges based on multifunctional methacrylic esters. PoloTemp Automix is a very easy and comfortable material for creating short- and long-term temporary crowns or bridges, inlays, onlays and veneers. Because of its flexibility, the material is especially suitable for longer bridge spans. PoloTemp Automix shows fluorescence similar to the natural tooth. PoloTemp Automix is free of methyl methacrylate.

contains 50 ml + 12 mixing tips

REF 620045	A1
REF 620050	A2
REF 620055	A3
REF 620060	A3,5
REF 620065	B1

Features and benefits:

- High fracture resistance.
- Methylmethacrylate free.
- Low temperature increase during setting.
- Natural fluorescence.
- Easy to trim and polish.
- Easy automix application.
- Reliable.
- For crowns and bridges.
- No irritations.
- Natural esthetics.
- Easy handling.

PoloTemp Automix has excellent mechanical properties that are comparable to or better than those of the leading competitors on the market. This ensures very good clinical performance.

Can be combined with:

POLO DENT
MATRIX SYSTEMS

Matrix Bands

In dentistry, matrix bands are thin strips of material, typically metal or plastic, used to restore the natural shape and contours of a tooth during fillings. They act as a temporary wall, confining the restorative material (like amalgam or composite) and helping to recreate proper contact points and contours.

PoloMatrix Sectional Matrix System
pre-contoured matrix bands

Bulk Kit

contains:

- 50 Matrix Bands 4,5 mm
- 50 Matrix Bands 5,5 mm

Budget Line

Striproll Matrix Band in Dispenser
9,5x0,05 mm

contains 15 meters

REF 636864

Transparent strip in handy dispenser for all filling materials, mostly used for front teeth. The transparent strip roll is used to clearly see the tooth structure and the filling material during filling.

- Makes adjacent contact points are well recovered;
- Efficiently restore the missing teeth shape and work with inter-dental wedge.

Teflon Matrix Band in Dispenser
13x0,1 mm

Teflon band in a handy dispenser helps to reduce gingival overhang, recovers proximal contact point.

contains 5 meters

REF 636870

Made of resin material, with good hardness & elasticity.

Features and benefits:

- Soft and light, good filling and shaping;
- Easy to cut, good extension and covering;
- Anti-corrosive and non-stick, good protection and isolation.

POLO DENT
PINS & POSTS

Pins & Posts

Pins & Posts are used to reinforce fillings and crowns when the tooth is too damaged or missing. Pins are thin, metal shafts, providing anchors for a filling or crown. Posts are thicker and are used to replace the pulp after a root canal treatment.

GLASSIX+plus

PoloDent Glassix +Plus is the latest generation of highly radiopaque and light transmitting fiber posts. Anatomically shaped to fit the root canal (cylindro-conical) with a colour coding for easy identification and mechanical retentions they come in different sizes.

Indication: For corono-radicular reconstructions.

Advantages:

- Anatomically shaped with a helicoïdal structure – twisted grooves – that gives mechanical retention without any breakage points.
- Elasticity close to natural dentine (20 Gpa).
- Enhanced mechanical properties (1500 Mpa).
- Aesthetic thanks to its translucent matrix.
- 100% biocompatible – epoxy free.

Glassix +Plus Fiber Posts

contains:

- 5 fiber posts no.1 (Ø 1,2 – 0,6 + reamer)
- 5 fiber posts no.2 (Ø 1,5 – 0,8 + reamer)
- 5 fiber posts no.3 (Ø 1,8 – 0,9 + reamer)
- 5 fiber posts no.4 (Ø 2,0 – 1,0 + reamer)
- 1 pilot reamer

POLO DENT[®]
POLISHING

Tooth polishing is a dental procedure that leaves the tooth enamel glossy and smooth. Not only does polishing provide a beautiful smile, when combined with dental scaling it noticeably freshens the breath and prevents tooth decay.

REF 738086 **RDA 120 (fine)**
REF 738088 **RDA 40 (x-fine)**

Prophylaxis Powder Classic

Supragingival.

based on sodium hydrogen carbonate.
The average particle size is 40 µm.

contains 300 g

REF 520200 **Mint**
REF 520205 **Lemon**
REF 520210 **Cherry**
REF 520215 **Cassis**

Proply Perio Plus

Supra- & Subgingival.

based on tagatose. The average particle size is 15 µm.

contains 120 g

REF 520230

Subgingival application:

- Removal of periodontal biofilm.
- Implant cleaning.
- Supporting after first parodontitis therapy treatment.

Supragingival application:

- Removal of supragingival biofilm and discolourations around the sulcus.
- Removal of discolourations near sensitive spots.
- Polishing of teeth, final polishing not needed.
- Applicable for regular prophylactic treatment.

Pumice Powder

contains 1000 g

REF 738050

PoloDent Pumice Powder is a light grey, odorless polishing powder that removes plaque and discolouration on the tooth.

PoloDent pumice powder consists of a medium grain, which lies between 0-300 µm.

Pumice powder is a natural product and does not pose a threat to the environment.

POLO DENT
PREVENTION

Prevention

Prevention means avoiding problems, and as you know, prevention is always better than cure. Prevention in dentistry focuses primarily on avoiding tooth decay (cavities) and gum problems, but also on self-protection.

Flosscard
Dental floss, mint flavour

contains 10x 10 meters
REF 771800

Flossing, also called floss or dental floss, consists of woven threads that are surrounded by a wax layer. Dental floss serves to clean the spaces between your teeth and prevent caries.

PoloDent Flosscard is a card with 10 meters of silk floss with mint flavor. The size of the card is perfect so you can always take it with you easily.

REF 768217 **large (8 mm)**

YELLOW POINT

Yellow Point Interdental Cleaners are interdental cleaners without a handle. The spaces between the teeth and molars are difficult to reach with a toothbrush and a interdental cleaner is used. Where there is sufficient space between the teeth, the choice for the use of interdental cleaners is preferred over toothpicks. Interdental Cleaners remove more dental plaque than toothpicks.

Yellow Point Interdental Cleaners are available in many sizes, from very narrow to extra large.

POLO DENT
HYGIENE

Hygiene

PoloDent has a widely applicable range of cleaning and disinfection products, concentrated or ready to use, spray or ampoules, probiotic or alcohol-free. When it comes down to a clean workplace, PoloDent has what you need!

POLODENT PROBIOTIC PRODUCTS

WHY PROBIOTIC CLEANER?

PoloDent Probiotic products provide a stimulation of good probiotics instead of killing and attacking microbes. In this way they restore the balance of microflora and reduce the risk of infections in your practice.

If these beneficial probiotics are used for cleaning they will eliminate all remaining dirt on a surface and install a healthy microflora. This reduces the risk of presence and proliferation of microbes and allergens. Since with this technique the microbes are not attacked directly, they will not build up any resistance. Further benefits are durability and safety because no harmful chemicals are used.

Probiotic Hand Cleaner

The revolutionary probiotic hand cleaner from PoloDent creates a healthy and stable microflora on the hands. The product has an efficient cleaning power and results in a strong improved hand hygiene. Mild for the skin and suitable for frequent use.

- Efficient dirt removal and degreasing.
- Applies a balanced microflora on the hands for a long term protection.
- Prolonged effect on the skin.
- Helps to maintain the natural acidity.

contains 2,5 litres

REF 820155

Probiotic Suction Cleaner

Probiotic Suction Cleaner is a concentrated and intensively effective probiotic cleaning fluid for saliva extraction systems, amalgam separators and spittoons (spittoons) in dental practices.

- Efficiently removes all contamination and keeps the tank and pipes clean.
- Prevents the formation of biofilm and reduces the risk of harmful germs in the installation.
- Prevents the formation of unpleasant odours.
- Has a long after-effect and is completely biodegradable.

contains 2,5 litres

REF 830040

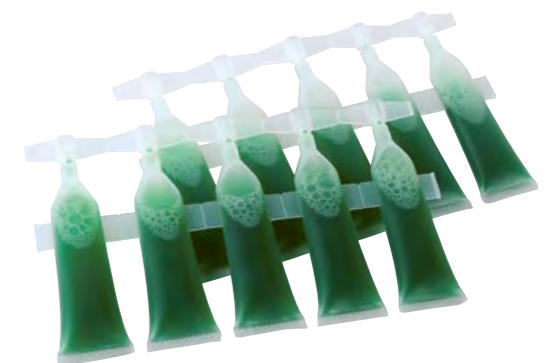

Probiotic Surface Cleaner

A concentrated probiotic all-purpose cleaner, fully biodegradable. After dilution the product can be applied on every water-resistant surface, included floor, bathrooms, office furniture, doors, walls and windows. The product has a strong triple action and a long lasting effect for optimal hygiene.

- Profound microscopic cleaning into the smallest impurities of a surface.
- Elimination and prevention of unpleasant odour.
- Introduction of a healthy and safe microflora on surfaces.

contains 2,5 litres

REF 830020

Probiotic Surface Cleaner in ampoules

- Fill the spray bottle with water.
- Empty an ampoule into the spray vial.

contains 10x 10 ml

REF 830022

CLEANING & DISINFECTION LIQUIDS

contains 2,5 litres

Instrument Disinfection Concentrate, 2% or 4% solution

Disinfecting and cleaning concentrate for instruments, burs and endodontic instruments and items. Chloride, aldehyde and phenol free.

REF 830005

Ultrasonic Cleaner Concentrate, 3% solution

Enzyme based concentrate for the pre-cleaning and decontamination of the non-porous surfaces of hand instruments and forceps, rotary instruments, mirrors etc. Designed for use in the Ultrasonic bath. Specially formulated for use in the Medical and Dental environment.

REF 830007

Bur Disinfection Concentrate, 4% solution

Disinfecting and cleaning concentrate for instruments, burs and endodontic instruments and items. Chloride, aldehyde and phenol free.

REF 830015

Spray Bottle (empty)

per piece

REF 830028

The PoloDent Spray Bottle is used to hold probiotic, cleaning or disinfection liquids (sold separately), up to 500 ml. The white spray tip can be adjusted to manage the flow.

Surface Disinfection Alcohol Free

Ready to use

Specially formulated for use in the medical and dental environment. Contains detergent. For the surface disinfection of medical devices, including but not limited to, dental chairs, examination lights and patient transport. Not intended for use on medical and dental instruments.

REF 830026

Surface Disinfection Spray Ready to use

PoloDent Surface Disinfection Spray is a ready to use solution for the surface disinfection of non-invasive medical devices. Alcohol is not recommended for use on dental/medical instruments.

contains 1 litre

REF 830024

Dry Wipes 29x38 cm

contains 70 pieces

PLUS

PLUS Suction Disinfection Daily, Citrus Fresh

Disinfection concentrate for suction systems, daily 2% or 3% solution

REF 838400

PLUS Instrument Disinfection Blue Flower

Disinfection concentrate for instruments

REF 838404

PLUS Surface Disinfection Cool River

Disinfection liquid for surfaces, ready to use!

Prophylactic rapid disinfection for the surfaces of invasive (e.g. handpieces and contra-angles) and non-invasive medical devices.

Only suitable for use on alcohol-compatible materials!

REF 838408

PLUS Suction Cleaner Weekly, aldehyde free

Cleaning concentrate for suction systems, weekly 5% solution

REF 838402

PLUS Bur Disinfection Green Flower

Rotary instrument disinfectant, ready to use!

REF 838406

THE 'PLUS' EFFICACY:

Suction Disinfection Citrus Fresh Daily

- Bacteria and Candida albicans under dirty conditions as an instrument disinfectant: 2,0% 5 min. 1,0% 60 min.
- Bacteria (dirty conditions): 3,0% 2 min.
- Candida albicans (dirty conditions): 3,0% 2 min.
- Enveloped viruses (e.g. HBV, HIV, HCV): 2,0% 2 min. (with contamination) 2,0% 5 min. (dirty conditions)

Instrument Disinfection Blue Flower

- Bacteria and Candida albicans, dirty conditions: 2,0% 15 min. 1,0% 60 min.
- TB (M. terrae), clean conditions: 2,0% 60 min.
- Mycobacteria, clean conditions: 3,0% 60 min.
- "Limited virucidal" (enveloped viruses), dirty conditions: 0,5% 15 min.
- Noro viruses, dirty conditions: 3,0% 15 min.
- Adenoviruses, clean conditions: 3,0% 60 min. 4,0% 30 min.
- Polyoma SV 40: 3,0% 15 min.
- "Virucidal" (unenveloped viruses), clean conditions: 3,0% 60 min. 4,0% 30 min.
- Fungi (A. brasiliensis), clean conditions: 3,0% 60 min.
- Contact times for terminal disinfection of semi-critical medical devices: 3,0% 60 min.

Bur Disinfection Green Flower

- Bacteria and Candida albicans, dirty conditions: 2,0% 15 min. 1,0% 60 min.
- Bacteria (incl. MRSA), dirty conditions: Conc.: 5 min.
- Candida albicans, dirty conditions: Conc.: 5 min.
- Mycobacteria, clean conditions: Conc.: 5 min.
- "Limited virucidal" (enveloped viruses), dirty conditions: Conc.: 5 min.

Surface Disinfection Cool River

- Bacteria and Candida albicans, dirty conditions: Concentrate 1 min.
- TB (Tuberculosis) pathogen, dirty conditions: Concentrate 1 min.
- "Limited virucidal" (enveloped viruses), clean conditions: Concentrate 30 sec.
- "Limited virucidal Plus" (enveloped viruses) and non-enveloped noro-, adeno- and rotaviruses, clean conditions: Concentrate 30 sec.

Self-Sealing Sterilization Pouches

contains 200 pieces

REF 841872	55x105 mm
REF 841874	70x228 mm
REF 841876	83x133 mm
REF 841878	90x165 mm
REF 841880	90x230 mm
REF 841885	132x254 mm
REF 841886	190x280 mm
REF 841887	252x350 mm
REF 841888	300x430 mm

Features and benefits:
 PoloDent Bur Disinfection Box has a round recess in the lid (closed with a removable plastic cap) to be able to place the drills in the tray. The lid is completely removable. There is a basket in the drill box and this is removable (you do not have to come into contact with the liquid.)

Bur Disinfection Box

Autoclavable, with internal filter.

per piece

REF 835210

- Autoclaveable up to 140°C
- Ø 8,5 cm (without lid)
- Height 8 cm.

Sterilization Reels

Bite Covers for Phosphor Plates

contains 250 pieces

REF 864145 size 0
REF 864150 size 1
REF 864160 size 2
REF 864165 size 3

Your precious phosphor plates will last longer by the use of PoloDent Bite Covers since they protect the plates for being easily damaged by scratches. The PoloDent Bite Covers are suitable for all phosphor plates (Digora, Dürr, Gendex).

Phosphor Plate Holders Positioning Pack

contains:

- 2 Bitewing holders
- 4 Posterior/Periapical holders
- 2 Phosphor plate cassettes size 1
- 2 Phosphor plate cassettes size 2
- 1 Positioning ring
- 1 Instruction poster

REF 873075

Phosphor Plate Holders, with clip

Intro Pack

contains:

- 2 Bitewing holders
- 4 Posterior holders
- 1 Positioning ring
- 50 Clips

REF 873205

Positioning Pack

contains:

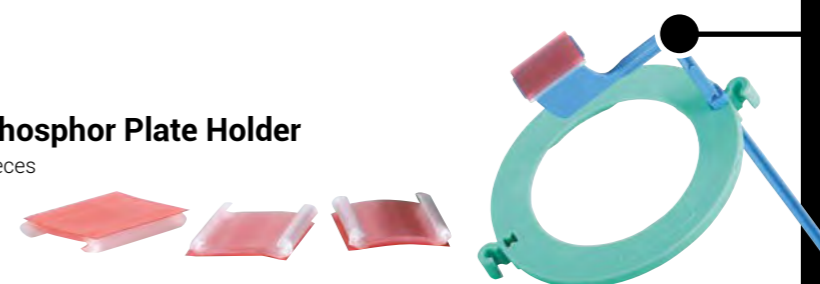

- 4 Bitewing holders
- 6 Posterior holders
- 1 Positioning ring

REF 873210

Clips for Phosphor Plate Holder

contains 300 pieces

REF 87 32 15

Sensor Holders Intropack

contains:

- 1 Bitewing sensor holder
- 2 Periapical sensor holders; UR, UL
- 2 Posterior sensor holders; UR, UL
- 2 Endo sensor holders; UR, UL
- 1 Positioning ring

REF 873005 size 1 (2x3 cm)
REF 873050 size 2 (3x4 cm)

Sensor Holders Refill

- REF 873010 Bitewing size 1 (10 pieces)
- REF 873015 Periapical size 1 (2x 5 each)
- REF 873020 Posterior size 1 (2x 5 each)
- REF 873055 Bitewing size 2 (10 pieces)
- REF 873060 Periapical size 2 (2x 5 each)
- REF 873065 Posterior size 2 (2x 5 each)
- REF 873070 Endo size 2 (2x 3 each)

Phosphor Plate Holders

The phosphor plate holder is a product for positioning and line up your phosphor plates. By use of the cassettes your phosphor plates will be protected and damages be minimal.

Phosphor Plate Holders with Clip

These are the phosphor plate holders with the innovative clip system. With this, we offer you the most accurate method for making phosphor plate pictures.

- Suitable for all cabled sensors;
- Up to 30% more exposure on Bitewing pictures, thanks to a thin bite face;
- Because of a fine positioning of the holder, the interdental space is very precisely viewed;
- The first system that's really user-friendly!
- With a simple turn the holder is compatible for the upper and lower cheek.

Cassettes for Phosphor Plates

contains 250 pieces

REF 87 30 80 size 1
REF 87 30 85 size 2

- No more damaged phosphor plates.
- Phosphor sleeves are no longer needed.
- Cleanable and reusable.

Foam Bite Blocks auto-adhesive

contains 200 pieces

REF 873100

- Universal use for x-ray films, phosphor and sensor sleeves.
- Suitable for anterior, posterior and bitewing.
- Patient-friendly, thanks to the adhesive edge at the short side and thickness of the soft foam fabric cushions.
- Excellent adhesive strength!

OPG Bite Block Sleeves

contains 500 pieces

REF 864185 size 1 (21x46 mm)
REF 864190 size 2 (40x70 mm)

The OPG Bite Block Sleeves are suitable for most of OPG bite blocks. They are made of textured vinyl and are strong enough to withstand the inevitably biting pressure which can occur due to, for example, nervous patients.

Sensor Sleeves

contains 300 pieces

REF 873105 size 1 (31x150 mm)
REF 873150 size 2 (37x150 mm)

- Suitable for all sensors and phosphor plates (2x3 cm and 3x4 cm).
- Very soft but strong material with rounded corners for an optimal comfort for the patient.
- Unique corrugated structure of the cover material makes it very easy to insert the sensor.

PoloWedge separating wedges

Assortment

contains:

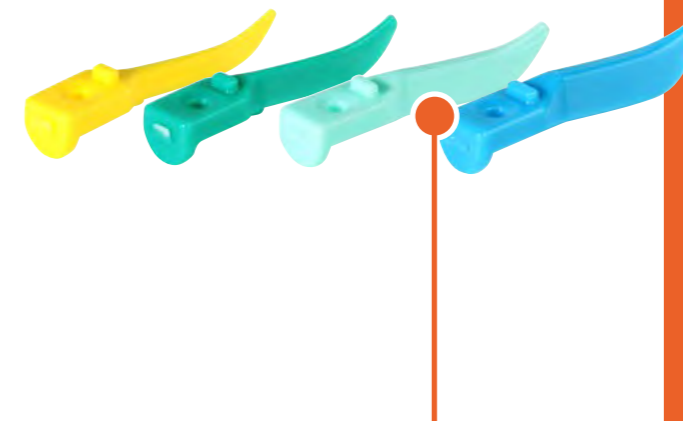

- 50 wedges yellow small
- 50 wedges green medium
- 50 wedges teal large
- 50 wedges blue x-large

REF 630132

Refill

contains 100 pieces

REF 630134 yellow small
REF 630136 green medium
REF 630138 teal large
REF 630140 blue x-large

Features and benefits:

The PoloWedge separates more than the material thickness of most stainless steel matrix bands removing the need for a separating ring.

The PoloWedge separating wedges that have parallel sides yet becomes progressively more rigid as it is inserted further. It's ski-jump tip is kind to the gingival papillae on the other side and it's easy to hold and push in. The PoloWedge provide good compression of the gingival tissues and prevents seepage while holding the matrix tight against the tooth.

POLO DENT[®]
W E D G E S

Wedges

Wedges in dentistry, often made of wood or plastic, are essential instruments that are placed interproximally (between two teeth) to stabilise matrix bands and slightly separate teeth during restorations (fillings). They ensure a good fit at the gum line (cervical), prevent overhanging filling materials and protect the gums.

POLO|MB|®

Our suppliers

We are proud that our PoloDent and Yellow Point products are available in most of Europe from trusted suppliers.
